# WiFi OEE MONITORING SYSTEM

A factory-floor signaling and production monitoring solution that provides instant, visual status updates of production lines and allows operators to raise alerts for immediate support. It also tracks real-time production data to help teams identify bottlenecks, monitor performance, and drive productivity.

### Sequence product - Production Summary

Time	Status	Duration	Breakdown
11:48:45 06 Nov 2025	Production	2m 4s	-
11:50:49 06 Nov 2025	Idle	4h 11m 15s	-
16:02:04 06 Nov 2025	Production	3m 18s	-
16:05:22 06 Nov 2025	Idle	1h 9m 59s	-
17:15:21 06 Nov 2025	Production	1m 37s	-
17:16:58 06 Nov 2025	Idle	3m 30s	-

Instant insights for  
unstoppable production.

Real-time visibility.  
Zero delays.  
Maximum productivity.

## Purpose

The fastest way to keep your  
factory running smoothly.

Your production line - clear,  
connected, & under control.

Where factory-floor clarity  
meets peak performance.

See issues instantly.  
Solve them faster.

Turn real-time data into  
real-world efficiency.

# Connectivity & I/O

**Wi-Fi Communication**  
 Enables Wi-Fi deployment with real-time data transmission for seamless integration

**RF ID Reader**  
 Inbuilt identification and tracking capabilities for enhanced production traceability

**Digital I/O**  
 3 Inputs & 3 Outputs for connecting sensors and controlling external devices

# OEE Modules

RFID Based Operator Efficiency

QR Code Based Part Traceability

Part Rejection Monitoring With Reasons

Integrated ANDON with Tower Light Input

# Software Capabilities

## Offline Storage

Up to 100,000 records capacity, ensuring data resilience during network downtime

## API Available

Flexible data access and customization options for seamless system integration

## System Integration

Easy integration with existing enterprise systems via available API to streamline data flow and reporting.

## Real-time Communication

Instant status updates & alerts for immediate operational awareness

**Embedded Computer**  
Reliable on-device processing

**I/O Ports**  
3 Digital Inputs +  
3 Digital Outputs

**Andon Tower Light**  
Integration-ready for visual signaling

**7" TFT LCD**  
Capacitive Touch Interface for intuitive operation

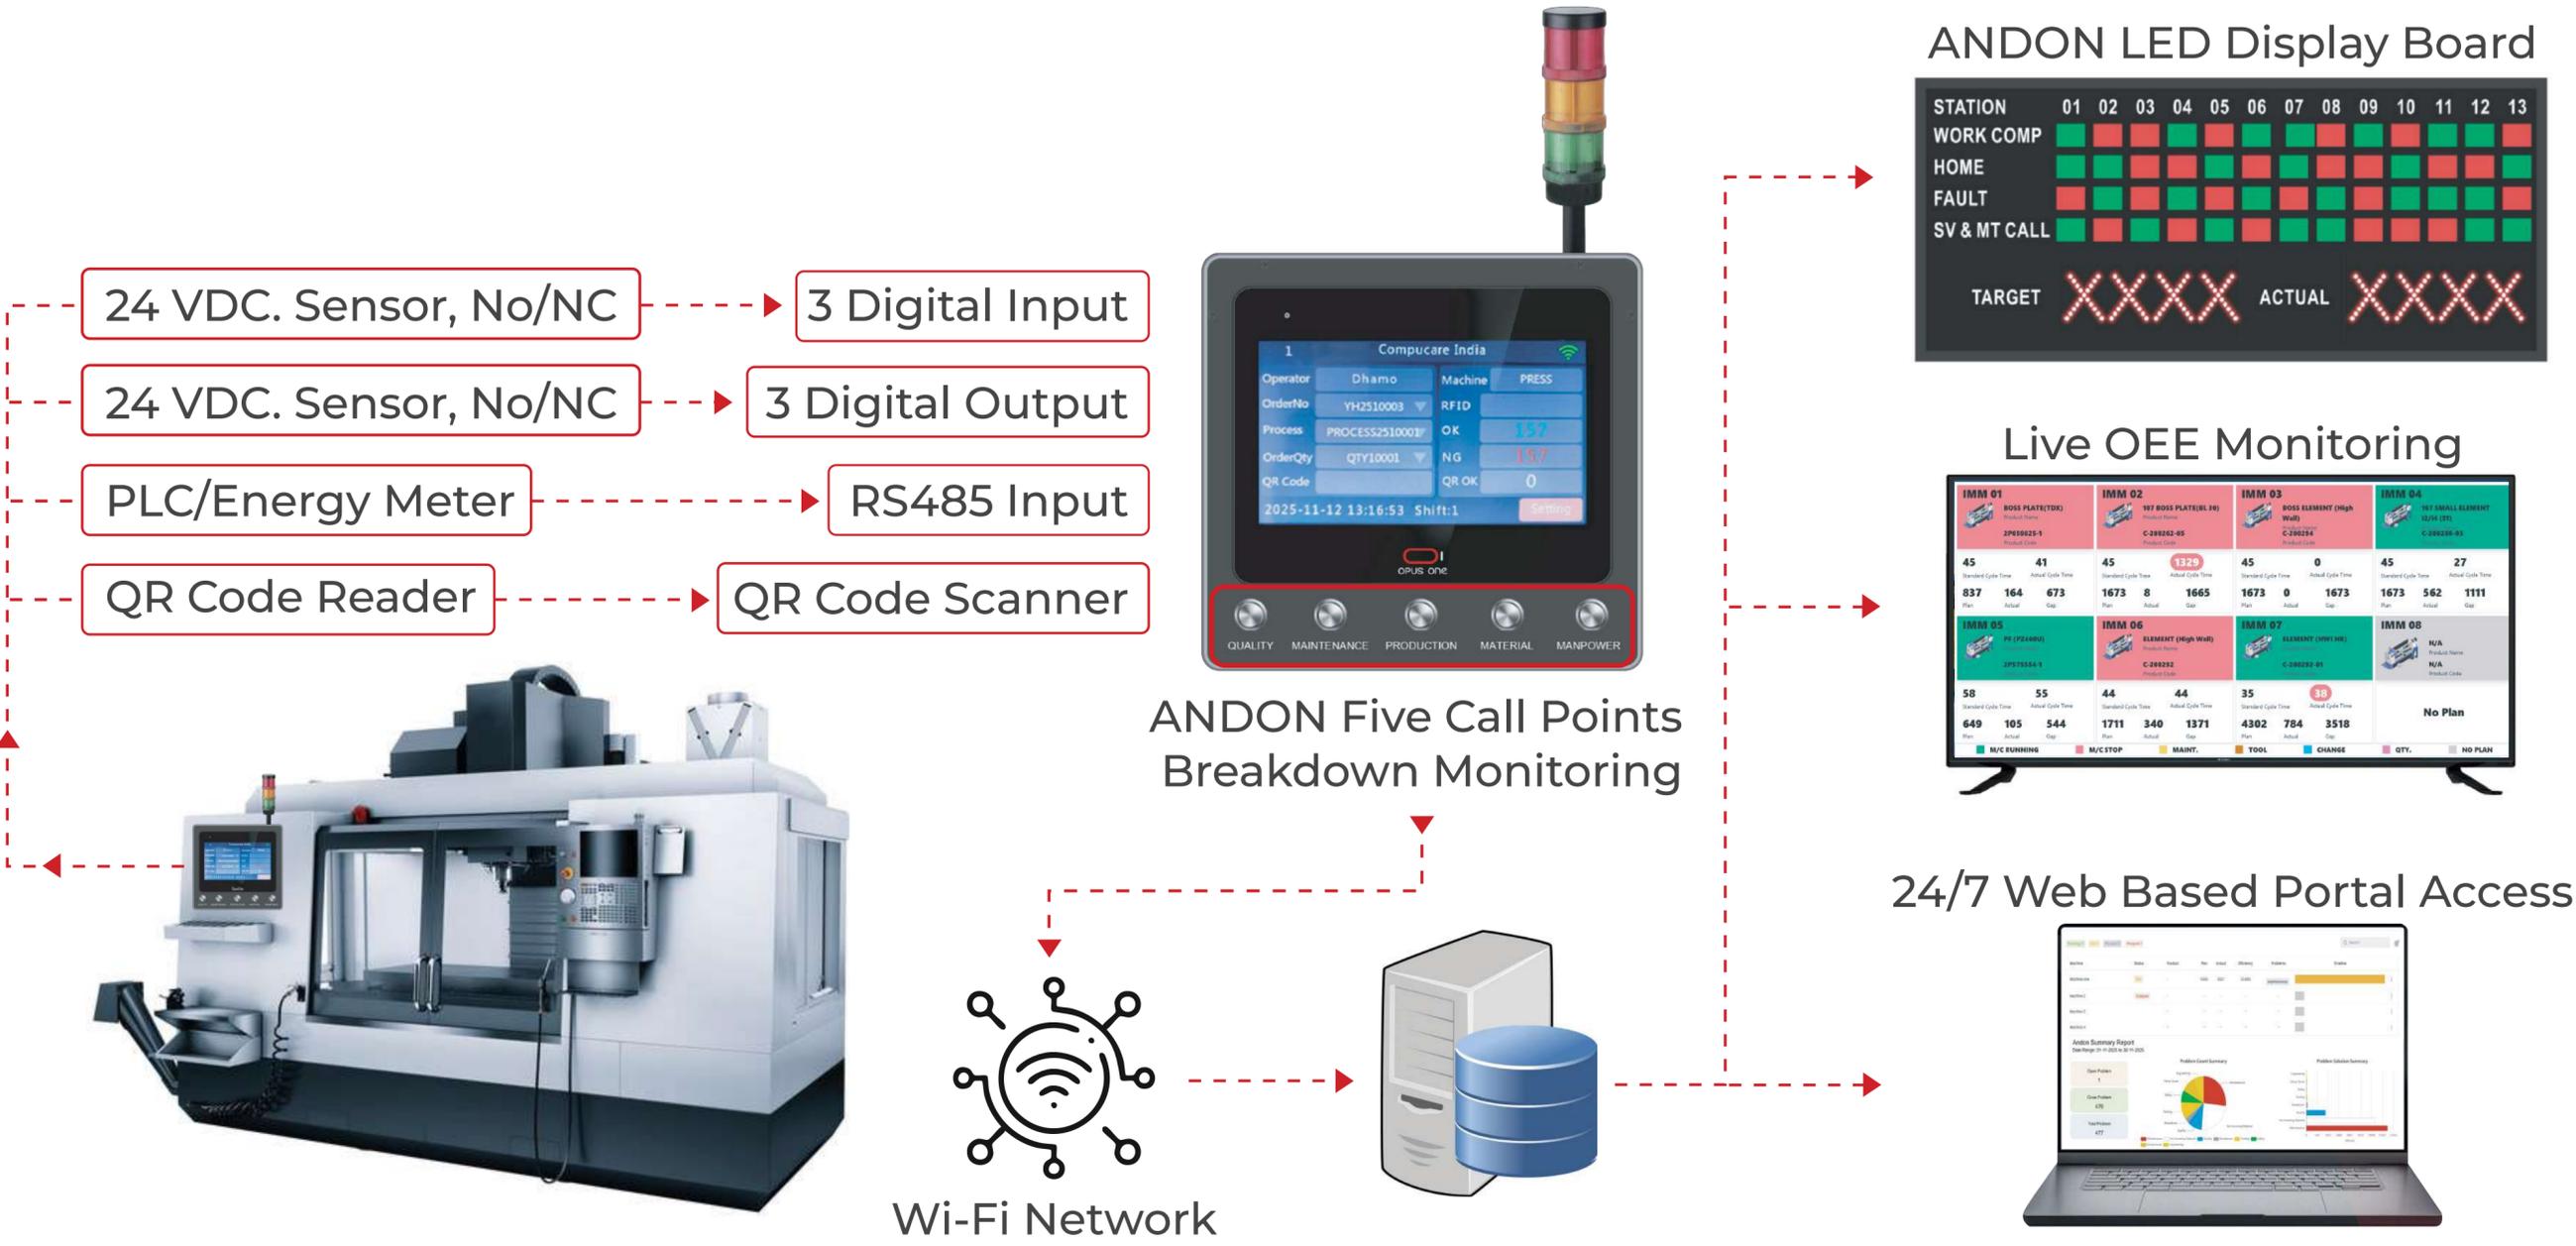

**Power Supply**  
12V - 24V DC compatible

24/7 Web Based Portal Access

“Engineered for All Sectors, Designed for Every Machine on the Floor.”

**Industry Coverage  
Trusted Across Diverse  
Manufacturing Sectors**

- Automobile & Auto Components
- Engineering & Industrial Manufacturing
- Textile & Fabric Processing
- Pump Manufacturing
- Motor & Electrical Equipment Manufacturing
- Plastic Industry

**Compatible Across All  
Manufacturing Assets  
Works Seamlessly With:**

- CNC Machines
- Press Machines
- Injection Moulding Machines
- VMC / VFC Machines
- Industrial Robots
- Looms & Textile Equipment and Many More

# Applications

Manufacturing  
production lines

Quality  
control stations

Maintenance  
request signaling

Real-time  
production monitoring

Lean manufacturing  
implementations

# Benefits

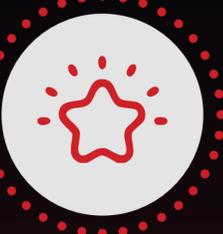

Reduce downtime with faster response

Improve quality and traceability (RFID support)

Seamless integration with ERP/SAP/MES

Scalable, reliable architecture

# Value Proposition

“Real-Time Visibility. Faster Decisions.  
Stronger Production Performance.”

## Instant, Live Production Insights

Track counts, targets, efficiency, & downtime in real time to keep operations aligned and proactive.

## Faster Issue Response & Reduced Downtime

Immediate visual alerts help teams react quickly to quality deviations, machine faults, or material shortages.

## Seamless Communication Across Teams

Unifies operators, maintenance, supervisors, and planners with a shared source of truth on the factory floor.

## Lean Manufacturing Support

Accurate, real-time data eliminates waste, shortens decision cycles, and improves overall production flow.

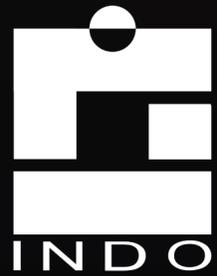

## Continuous Improvement Built In

Analyze trends, losses, and bottlenecks to drive smarter optimization and long-term productivity gains.

# ROI Summary

# Client Testimonial

" We were the first company in our region to move towards industry 4.0 among our competitors like Maruti & Honda. Our Productivity increased by 15-20%. It saved management time by providing real time data. We noticed a change in visibility of our data to visitor. It is a must have system for all manufacturing companies."
